---

## SUMMARY

Software Engineer with a background in Biosystems Engineering and a transition to technology through the Women Can Code program. Over 4 years of experience in frontend development with React applications. Familiar with projects using agile methodology, committed to delivering clean code, accessible, and responsive interfaces.

## PROFESSIONAL EXPERIENCE

### Frontend Developer

2022-Present

#### Prime IT - Farfetch

Porto, PT

Initially responsible for building an application using vanilla JavaScript, replacing an old spreadsheet-based process. Rebuilt the application with React as it scaled. Working in a data analysis-focused team, now leading training for the newest web developer on the team.

#### Key Accomplishments:

- Developed and maintained the first application, using **JavaScript**, **jQuery**, **Bootstrap** and **CSS**.
- Developed and maintained the second application, rebuilt with **React** and **SCSS**.
- Integrated backend services through **Firebase**.

### Frontend Developer

2020-2022

#### Venturus - Ingenico

Campinas, BR

Started as a Junior Frontend Developer, working in a Scrum team for a Latin America project. Promoted to Mid Frontend Developer due to demonstrated expertise and commitment, and selected to work on an international project in a SAFe-based team.

#### Key Accomplishments:

- Developed and maintained frontend applications using **React**, **Redux-Toolkit**, **TypeScript** and **Gatsby**.
- Handled data fetching and API Integration through **REST** and **GraphQL APIs**.
- Merged new features based on **code review** request.
- Implemented tests using **Jest** and **Cypress**

## EDUCATION

Postgraduate in Software Engineering: PUC Minas

2022 - 2023

Bachelor of Biosystems Engineering: University of Sao Paulo (USP)

2013 - 2018
